

Riku Hakamäki

ICT Engineering Student

Telecommunication and Networks

About me

Motivated and technically oriented final-stage Information Technology engineering student. Through my studies, I have developed expertise in cybersecurity, network management, cloud services, and network documentation. My goal is to build a career in cybersecurity, modern telecommunications solutions, and network systems. I am currently looking for a thesis opportunity in the fields of network management, cloud services, or cybersecurity.

Work Experience

05/2026 – 06/2026

Tampere University of Applied Sciences
Trainee

During my internship, I worked with network and IT environments in various laboratory and development tasks. My responsibilities included configuring network devices, maintaining virtualization environments, building a Windows Active Directory lab, and configuring and performing security testing on an Aldebaran Robotics NAO robot. I also contributed to technical documentation and the development of various test environments.

05/2025 – 06/2025

Tampere University of Applied Sciences
Trainee

I worked as part of a team that designed and implemented the network backbone cabling for a school laboratory environment. My responsibilities included cabling design, installation and termination, as well as connection testing and documentation. The project strengthened my practical skills in network infrastructure, cabling standards, and hands-on networking work.

01/2023 – 07/2023, 05/2024 – 07/2024

Froneri Finland Oy, Turenki
Seasonal Worker

My responsibilities included operating production machinery and monitoring its performance in a production environment. I helped minimize production downtime and independently handled several operational issues on a weekly basis. I received positive feedback from both my supervisor and colleagues for my strong work ethic and proactive approach to problem-solving.

04/2021 – 10/2021

Froneri Finland Oy, Turenki
Seasonal Worker

I worked in ice cream packaging across several production lines, which required quick adaptation to changing tasks and processes. As part of the production team, I helped ensure smooth shift handovers and continuity of production. The role emphasized attention to detail, efficiency, and teamwork.

06/2020 – 07/2020

Suurustin Ky, K-Market Ruokasaari, Riihimäki
Summer Employee

I worked at a Matkahuolto service point located within the store, as well as in a cashier role. My responsibilities included customer service, processing payments, and handling parcels. The role required accuracy, responsibility, and the ability to work efficiently in busy customer service situations.
